ACT OF 2008

SEPTEMBER 15, 2008.—Committed to the Committee of the Whole House on the
State of the Union and ordered to be printed

Mr. OBERSTAR, from the Committee on Transportation and
Infrastructure, submitted the following

R E P O R T

[To accompany H.R. 6627]

[Including cost estimate of the Congressional Budget Office]

The Committee on Transportation and Infrastructure, to whom
was referred the bill (H.R. 6627) to authorize the Board of Regents
of the Smithsonian Institution to carry out certain construction
projects, and for other purposes, having considered the same, re-
port favorably thereon without amendment and recommend that
the bill do pass.

PURPOSE OF THE LEGISLATION

H.R. 6627, the “Smithsonian Institution Facilities Authorization
Act of 2008”, authorizes the Board of Regents of the Smithsonian
Institution to design and construct laboratory space to accommo-
date the Mathias Laboratory at the Smithsonian Environmental
Research Center in Edgewater, Maryland, and authorizes the
Board of Regents to construct laboratory space to accommodate the
terrestrial research program of the Smithsonian Tropical Research
Institute in Gamboa, Panama.

BACKGROUND AND NEED FOR LEGISLATION

The Smithsonian Environmental Research Center (“SERC”) is a
global leader in the study of ecosystems in the coastal zone. Found-
ed on the site of an abandoned 1930s dairy farm in Edgewater,
Maryland, the SERC facilities include a mosaic of farm buildings,
the Mathias Laboratory, 10 temporary trailers, an administrative
building, and a variety of lab support spaces. Nearly one-half of
SERC’s 146 employees and fellows conduct the majority of their

work in trailers. The Board of Regents of the Smithsonian Institution requests authority to design and construct laboratory space to accommodate the Mathias Laboratory at SERC.

The Smithsonian Tropical Research Institute (“STRI”) is the principal United States organization devoted to research in tropical biology. Tropical biology is critical to finding untapped resources to add to the important supply of food, pharmaceuticals, and fiber of tropical regions. STRI has outgrown the space available at its current facilities and this bill provides for construction of a new lab in Gamboa, Panama. The terrestrial research program is critical to understanding the role that tropical plants and soils play in global climate change models and for enriching knowledge of tropical biodiversity. The Board of Regents of the Smithsonian Institution requests authority to construct laboratory space to accommodate the terrestrial research program of STRI in Gamboa, Panama.

H.R. 6627—Smithsonian Institution Facilities Authorization Act of 2008

H.R. 6627 would authorize the appropriation of \$41 million for laboratory and support space at the Smithsonian Environmental Research Center in Edgewater, Maryland, and \$14 million for laboratory space at the Smithsonian Tropical Research Institute in

Gamboa, Panama. Assuming appropriation of the authorized amounts, CBO estimates that implementing H.R. 6627 would cost \$55 million over the 2009–2013 period. Enacting the bill would not affect direct spending or receipts.

H.R. 6627 contains no intergovernmental or private-sector mandates as defined in the Unfunded Mandates Reform Act and would not affect the budgets of state, local, or tribal governments.

On August 25, 2008, CBO transmitted an identical cost estimate for H.R. 6627 as ordered reported by the Committee on House Administration on July 30, 2008.

The CBO staff contact for this estimate is Christina Hawley Anthony. This estimate was approved by Peter H. Fontaine, Assistant Director for Budget Analysis.

COMPLIANCE WITH HOUSE RULE XXI
